We are delighted to send you our latest brochure.
Please find enclosed:

- Client testimonials
- Recently commissioned systems
- Commissioning services

Lightbout.iQ is an award winning, independent lighting design consultancy. We are committed to providing an unparalleled level of service from concept to completion. Our team is dedicated to enhancing the magical relationship that exists between architecture and light. We believe that all successful schemes ensure that functionality and ease of use remain at the heart of a project. This is why we discuss “controls” at the start of your project to ensure your expectations are met.

Yours sincerely

David Celeiro
Lighting Designer & Controls Technician

CLIENT TESTIMONIAL

Hammersmith House - London

A contemporary home almost entirely rebuilt over 18 months. Lutron was integral to the clients requirements for energy efficiency and ease of use. With a strong design element multiple lighting circuits were required to ensure longevity for this 'forever' house.

The Homeworks QS system delivered a truly intelligent, futureproof, adaptable and flexible system. Colour was also subtly incorporated in to some architectural details which required DMX programming in addition to 21 areas, 84 lighting circuits, 22 blinds and 21 control plates.

“ I am delighted to have invested in a Lutron state of the art lighting control system. My favourite aspects include the ease of use, one button to turn on or off the whole house, one button to set holiday mode, buttons in the basement which ensure the rest of the house is off if no one is on the other floors.

I can open my sky lights, close all the blinds in the house, and control the garden from any space I choose. I love the touch panel screens, although a little expensive I find them super intuitive. David had made many brilliant suggestions in the programming. We lived with these for a few months and then asked for some tweaks to be made.

I suspect in another 6 months I will ask for a return visit as we will have (hopefully) some more furniture / lamps and pendants by then which would be great to programme in. The Lutron has been one of the easiest experiences, it has never gone wrong and is simple to use. Many Thanks ” MRS. WEIR

OUR SERVICES

Outline Lighting Control Strategy

Whether you are looking to open a restaurant in Paris or renovate your apartment, we can provide clear and impartial advice on the Lighting Control System. Our lighting performance specification report will reflect your control expectations and minimize issues with LED compatibilities, dimming protocols and A/V integration.

End to End Control System Proposal

One stop solution, we will analyse the client's requirements. Having established a clear brief, we translate this into a Lighting Control System proposal with estimated costs. We will liaise with all parties involved on the project, providing a full design service including wiring schematics, technical support and site visits. Finalising the process includes setting light scenes & client training to ensure the best possible performance and ease of use.

Fast Track Commissioning

Ideal for clients familiar with Lighting Control Systems, this service is being offered to provide a quicker and more flexible approach. You may require new programme settings, extend to your system for additional lights, replace or upgrade your system. We would be delighted to help you. The fast track commissioning service is charged on an hourly rate, £100 plus VAT.

System Maintenance

Lightbout.iQ aftercare service offers specifically tailored maintenance packages. Technology requires updates from time to time, and occasionally equipment has to be repaired or replaced. We provide aftercare and support for your system to ensure everything runs smoothly.
