DELIVERING EXCEPTIONAL LIGHTING

OUR SERVICES

Outline Lighting Control Strategy

Whether you are looking to open a restaurant in Paris or renovate your apartment, we can provide clear and impartial advice on the Lighting Control System. Our lighting performance specification report will reflect your control expectations and minimize issues with LED compatibilities, dimming protocols and A/V integration.

End to End Control System Proposal

One stop solution. We will analyse the client's requirements in depth. Having established a clear brief, we translate this into a Lighting Control System proposal with estimated costs. We will liaise with all parties involved on the project, providing a detailed wiring schematics, technical support. Finalising the process includes setting light scenes & client training to ensure the best possible performance and ease of use.

Fast Track Commissioning

Ideal for clients familiar with Lighting Control Systems, this service is being offered to provide a quicker and more flexible approach. You may require new programme settings, extend your system for additional lights, replace or upgrade your system. We would be delighted to help you. The fast track commissioning service is charged on an hourly rate, £100 plus VAT.

System Maintenance

Lightbout.iQ aftercare service offers specifically tailored maintenance packages. Technology and spaces require updating from time to time, and occasionally equipment has to be repaired or replaced. We provide aftercare and support for your system to ensure everything runs smoothly.
